

WIZARD AMIGOS

HOW WORK IS DONE

- All assigned tasks are in a Todo section (which would be updated as tasks are ongoing)
- All tasks have subtasks with inputs and outputs
- Outputs can be codes, pictures, wireframe links, and documents (**links**)
- "?" is placed bear an output to mean it has been planned as an input somewhere else
- Worklog comments help ease communication. An assignee works on the comment whether or not the task is complete, then a screencast video has to be created

Link to output file should be provided in the Worklog including time of work and details

Output flow

Create Task > Plan output >Plan inputs in other tasks

Contract and Agreement

- A time log is created where the worker inputs time of work, details of work, and a visible link to a screencast video
- A contract can be updated from time to time

Pastebin

This has two linked files named **Checklist and Daily reminders**. They are the blueprint, a guide to how work is done, and would serve as reminders if need be

ABOUT WIZARD AMIGOS

Wizard Amigos is a P2P tech community where people with the same goal learn and earn simultaneously. It is a skill value network that includes :

- E-learning
- Tasks
- Coding
- Events
- Pictures
- Jobs

It started in 2013/2014 and had a milestone in 2016 when it began to focus on digitals and numbers. It has also had over 2k events in the space of 8 years with a Facebook community of over 800 members.

Wizard Amigos is running a discord server where people who share the same local regions learn and work together.

Goals

- Redo the latest web page
- **Cabal Chat** (very similar to Discord but with no servers)
- A Switch from using Discord and GitHub to reduce decency on existing platforms)
